ROHDE Sells Nitriding Furnace to Mexican Customer

Furnace builder ROHDE Schutzgasöfen GmbH based in Hanau, Germany sends us this press release about a nitriding furnace the company will shortly be shipping to Mexico. The company takes the opportunity to tell us about the birth of the owners second child, adding a personal note to this story. October 13, 2017

“This picture shows Konstantin Alexander Rohde with his parents Natasha and Joern after the final check-up of a fully equipped nitriding chamber furnace for the treatment of automotive parts. After a successful preliminary “hot” acceptance under real working conditions the furnace is now ready to be shipped to Mexico. Konstantin is the second son of Natasha and Joern and was born on October 2nd 2017.”
